Kubernetes has become a central component for containerized applications. And it is nowhere near its peak. In fact, based on our research, 94 percent of survey respondents believe that Kubernetes will be a bigger part of their system design over the next two to three years.

Sponsor DZone’ Kubernetes: Future-Proof or Future Legacy Fireside Chat and join us as we discuss today’s adoption and deployment methods, leveraging Kubernetes, and much more.

Sponsor slots are limited! Reserve your spot by May 11.
